WHEREAS, It was with a deep and sincere feeling of regret that the Mayor and the City Council of Chicago learned of the recent death of Judge CASIMIR GRIGLIK of the Superior Court of Cook County; and

WHEREAS, Mr. Griglik was a native of Poland and was brought to this country by his parents at the age of seven years. He was educated in the east and obtained his law degree from New York University and was admitted to the Illinois bar in 1937; and

WHEREAS, Following his admission to the bar, Mr. Griglik began a distinguished career of public service. From 1945 to 1948 he was advisor to the securities department of the office of Secretary of State. He served with distinction for eleven years as a trustee of the Metropolitan Sanitary District of Greater Chicago. When he resigned this office to become a judge, he was the district's vice president and chairman of its finance committee. He served as master in chancery for the Superior Court and as a member of the Governor's Committee on Metropolitan Water and Sanitation. He was active in Polish-American affairs, having served as president of the Chicago Society Group 1450 of the Polish National Alliance; and

WHEREAS, Mr. Griglik was a veteran of World War I and served as an appeal agent for the Chicago Draft Board during World War II. Possessing an attractive personality, Mr. Griglik won an outstanding reputation as a public speaker. He leaves him surviving his widow, a son and daughter, a brother and three sisters. Now, therefore,

Be It Resolved, That the Mayor, the City Council and the people of the Chicago area hereby express their sense of loss on the death of Judge CASIMIR GRIGLIK and extend to the members of his bereaved family their sincere sympathy.

By unanimous consent committee consideration was dispensed with, and on motion of Alderman Keane said proposed resolution was Adopted, unanimously, by a rising vote.

WHEREAS, DR. EMIL H. GRUBBE, the father of X-ray therapy, died on March 26, 1960; and

WHEREAS, There are no words to adequately bespeak the nobility of the man who not only dedicated his life to the healing of the sick but who, by reason of such personal dedication, actually gave his life in that cause. For it was the direct result of his work with X-ray that he underwent ninety-three operations for damage from radium burns and finally succumbed to the disease which he combated. In 1895 Dr. Grubbe began his experiments with X-rays in the treatment of cancer. From 1899 to 1919 he headed the radiology department of Hahnemann Medical College in Chicago. There he trained thousands in the use of radiation as medical treatment which became effective in combating hundreds of diseases. He was the discoverer of platinum lode and from this element produced vacuum tubes for use in X-ray work. His entire life was an unceasing and selfless devotion to the cause of alleviating human suffering. Now, therefore,

Be It Resolved, That the far-reaching effects on humanity which result from the work of DR. EMIL H. GRUBBE are inestimable, that the sacrifice which his life represented is beyond our power of compensation, and that the debt of gratitude which humanity owes to him is immeasurable. SECTION 2. This ordinance shall be in force and effect from and after its passage.

Authority Granted for Acceptance and Execution of First Amendment to Federal Grant Agreement for Chicago-O'Hare International Airport.

The Committee on Finance submitted a report recommending that the City Council pass a proposed ordinance transmitted therewith to authorize acceptance and execution of the First Amendment to the Federal Grant Agreement for Chicago-O'Hare International Airport Project No. 9-11-012-507.

On motion of Alderman Keane the committee's recommendation was concurred in and said proposed ordinance was passed, by yeas and nays as follows:

Nays—None.

Alderman Janousek (seconded by Alderman Campbell) moved to Reconsider the foregoing vote. The motion was Lost.

The following is said ordinance as passed:

Be It Ordained by the City Council of the City of Chicago:

SECTION 1. That the Mayor, subject to attestation by the City Clerk, and approval as to form and legality by the Corporation Counsel, is authorized to accept and execute, on behalf of the City of Chicago, a first amendment to Grant Agreement for Chicago-O'Hare International Airport Federal Aid to Airports Project No. 9-11-012-507, said amendment to be in substantially the following form:

FIRST AMENDMENT TO GRANT AGREEMENT

(Corrective)

Chicago-O'Hare International Airport
Chicago, Illinois
Project No. 9-11-012-507
Contract Serial No. C3ea-281A

Whereas, while not specifically included in the project description in the Grant Offer issued and accepted on the above-identified project, the intention of the Sponsor, the City of Chicago, Illinois, to include and construct as a part of the project work a widened paved area contiguous with the taxiway near the SE end of the NW/SE runway as thereafter to be constructed, to serve as a warm-up and holding apron, was occasioned by the depiction thereof on the sketch submitted with its Request for Aid on which programming approval was based, as well as by its being depicted in the approved project plans and specifications; and

Whereas, subsequent to the approval of said plans and specifications and the execution of the Grant Agreement for the above-identified project, it was determined that a change in design was necessary to provide a considerably more extensive warm-up and holding apron area in order to afford proper clearance between holding and passing aircraft and to afford, under IFR conditions, holding positions more distant from the NW/SE designated instrument runway in order to avoid adversely affecting the operation of the Instrument Landing System; and

Whereas, the Sponsor has caused such increased warm-up and holding apron area, 125' x 500', to be constructed in conformity with Change Order approval, and, considering the significant increase in project contract costs occasioned by such change in design and the related Change Order work, it is desirable and appropriate that by specific project description the mutual intentions and understandings of the parties with respect to the accomplishment of such work as a part of the project be formally established; and

Whereas, in order to provide for full Federal participation in the allowable costs of said project, including such additional warm-up and paving area work, it will be necessary to increase the amount of the Federal grant for said project by $21,000, from $1,665,000 to $1,686,000; and

Whereas, the Administrator of the Federal Aviation Agency (successor in function to the Administrator of Civil Aeronautics) has determined it to be in the interest of the United States that the Grant Agreement on the above-identified project between the Administrator of Civil Aeronautics, acting for and on behalf of the United States, and the City of Chicago, Illinois, be amended as hereafter provided; Now, Therefore, Witnesseth:

That in consideration of the benefits accruing to the parties hereto, the Administrator of the Federal Aviation Agency, on the one part, and the City of Chicago, on the other part, do hereby mutually agree that the said Grant Agreement shall be and it hereby is amended as follows:

(a) By substitution of the following for the project description appearing on Page 1 of Part I—Offer:

"Land acquisition; grade, drain and pave new NW/SE runway (approximately 3000' x 200'), with parallel and connecting taxiways, including warm-up and holding apron (approximately 125' x 500'); turf disturbed areas; install electrical ducts; mark runways and taxiways; install high intensity lighting system on new NW/SE designated instrument landing runway; install taxiway and warm-up and holding apron lighting."

"(This is in addition to the development covered by Project Nos. 9-11-012-801, -902, -903, -904, -105 and -206.)"

(b) By substitution of the amount $1,686,000 for the amount $1,665,000 appearing in numbered Paragraph 1 on Page 2 of Part I—Offer.
In Witness Whereof, the parties hereto have caused this First Amendment to said Grant Agreement to be duly executed as of the ................., 1960.

1. Lessee agrees in consideration of the leasing of the demised premises to it by Lessor to pay to Lessor from parking revenue and/or Parking Revenue Bond Fund, to Lessor as minimum guaranteed rental for said premises the sum of Twenty Thousand Eighty-Five ($20,085.00) Dollars, payable as follows: Two Thousand Fifteen ($2,015.00) Dollars in advance (receipt of which is hereby acknowledged) which is to cover rental for the period from November 1, 1959 to May 31, 1962; Sixty-Five ($65.00) Dollars payable on June 1, 1962 and on the first day of each and every month thereafter of said term. The minimum guaranteed rental shall prevail during the entire term of the lease.

The aforesaid percentage of gross revenues to be paid to Lessor by Lessee, shall prevail for the first five (5) years of the term of the lease.

Six months prior to the expiration of the first five-year term of the lease, upon written demand of either party to the other, a redetermination of the percentage of division of gross revenues may be negotiated. If the parties agree in writing to a new percentage, such new percentage shall become effective on the first day of the beginning of the second five-year term of lease. If the parties are not able to agree upon a new percentage, within ninety days after receipt of said written request, a new percentage shall be determined by the Lessor's regular independent public accountants, which shall be a firm of recognized national standing. Such new percentage shall become effective on the first day of the second five-year term.

2. Lessee shall at its own expense make any and all improvements necessary to place the demised premises in satisfactory condition to be used for the parking of automobiles. All of the above mentioned work shall be subject to approval and under the direction of the General Superintendent of Engineering of the Lessor.

Lessee also agrees to pay all other charges and impositions, including water rates, which may be levied or imposed upon the demised premises by reason of its occupancy and use by Lessee.

If such taxes, charges and impositions shall remain unpaid by Lessee, Lessor, at its option, shall have the right to pay the same, or any of them, and any amount so paid by Lessor shall be so much additional rent due from the Lessee to Lessor.

4. Lessee agrees to pay the cost of all permits, bonds and license, or other fees, in connection with the improvement and use of said premises by it.

5. Lessee agrees that it will keep the demised premises in neat and sanitary condition; that it will not use the demised premises for any purpose other than that hereinafore specified; that in its use of the demised premises it will conform with all laws, ordinances and municipal regulations; and that it will not assign this lease or sublet the demised premises or any part thereof without the prior written consent of the Lessor.

6. Lessee agrees to indemnify and save harmless the Lessor from all loss, cost or expense because of damage to the elevated railroad structures resulting from the occupancy and use of the demised premises under this lease or because of damage to property or injury to persons (including injury resulting in death) while on that portion of the demised premises underneath the elevated railroad structure, at Lessee's invitation or with its permission occasioned by anything done or omitted by Lessee in the use of said premises, or because of damage to property or injury to persons (including injury resulting in death) while on that portion of the demised premises or any part thereof without the prior written consent of the Lessor.

7. Lessee agrees to save and keep harmless Lessor of and from any claims for mechanic's liens by reason of any work done upon the demised premises by or for Lessee.

8. Lessee shall have the right to terminate this lease upon sixty (60) days' written notice to the Lessor if any permit or license to use the property for parking automobiles by the public is revoked or cancelled or if Lessee is prevented by other means from the operation of said property for the parking of automobiles by the public.

9. If Lessee shall default in the payment of any of the rent or other charges herein specified upon the day the same become due and payable, or shall default in or fail to perform and carry out any of the other covenants, terms and conditions herein contained, and such default or failure shall continue for thirty (30) days after notice thereof in writing given by the Lessor to the Lessee, the Lessor may, at its election, declare the term of said lease ended and either with or without process of law to re-enter said premises.

10. It is expressly agreed that this lease may be terminated by the Lessor at any time before the expiration of its term by giving to Lessee sixty (60) days' notice in writing thereof, in case the use of the demised premises is desired for transportation purposes, or in case of the sale of said premises; in the event said lease is terminated by Lessor
for Lessor's use or because of sale of premises, then
Lessor shall reimburse Lessee for the proportionate
part of the total cost of the improvements made by
Lessee, as the ratio of the unexpired number of
years of the lease is to the total 25-year 9-month
term. Upon expiration or termination of this lease
as hereinabove provided, Lessee shall immediately
yield up possession of said premises.
11. Any notice required or provided to be served
on Lessee shall be sufficiently served if the same

The control valves shall be located within the City, and such meters, meter equipment, control vaults and valves at all times shall be under the control of the City, but the full and complete maintenance and protection of such meters, meter equipment and control vaults shall be the obligation of the Village of Dolton.

8. The properly authorized officers, agents and representatives of the City shall at all times have free access to the meter or meters and all other facilities herein provided for, for the purpose of shutting off the water for failure to pay the water rates or charges in this agreement provided to be paid by the Village of Dolton and for the purpose of reading the registration of such meter or meters, and to examine, shut off and test the same to ascertain whether or not they are in good condition and repair and to make such repairs upon the same as may be necessary; the expense of any and all necessary repairs to be borne by the Village of Dolton.

9. If at any time the said meter or meters shall fall to register correctly the quantity of water furnished and taken hereunder, or shall fail to register the flow of water through said meter equipment, the unregistered, under-registered, or over-registered amount of water furnished and taken shall be determined by taking an average of the twelve (12) preceding readings of such meter, or meters, exclusive of deficient or excessive readings. Where said meter or meters have been installed for a period of less than one (1) year or where less than twelve (12) competent readings exist, such average or estimate may be based upon a lesser number than twelve (12) readings taken preceding or subsequent to such incorrect or stopped registrations. In both instances, the Commissioner of Water and Sewers of the City shall determine which are excessive or which are deficient readings, and also shall determine the number of months under which such estimate is to be based.

10. The Village of Dolton, at its own cost and expense, shall provide, make and keep in repair all feeder mains, connections, meter vaults, receiving tanks or tanks, booster or other pumps and slow acting valves, or other appliances deemed necessary by the Commissioner of Water and Sewers of the City and the point of connection herein designated. A shut-off gate or gates, reservoir or reservoirs of sufficient capacity to store not less than one (1) day's supply of water; receiving tank, or tanks, booster or other pumps, slow-acting valves and such other appliances or devices as may be required by said Commissioner of Water and Sewers for the purpose of increasing, decreasing, and otherwise controlling the water supply furnished and taken hereunder; said equipment and appliances to be of such type, size and design as shall be satisfactory to and approved by said Commissioner of Water and Sewers, and the entire installation thereof shall be under the direction of and performed in a manner satisfactory to and approved by said Commissioner of Water and Sewers. 12. The water supply furnished and taken hereunder shall be drawn by the Village of Dolton at an even rate of flow throughout twenty-four (24) hours of each day during the period from October 1 of each year to May 15 of each succeeding year; and at an even rate of flow throughout twenty (20) hours from 10:00 P.M. of each day to 6:00 P.M. of each succeeding day during the period from May 15 to October 1 of each year.

The failure, neglect or refusal on the part of the
Village of Dolton to make promptly and properly such changes in its piping, to maintain tightness, or to eliminate undesirable connections upon receipt of notice in writing from said Commissioner of Water and Sewers so to do, shall furnish sufficient grounds for the City to shut-off the water and discontinue the service hereunder until changes and corrections in said piping or connections required by the City are made by the Village of Dolton.

14. The Village of Dolton agrees to prevent excessive use and waste of water.

15. The Village of Dolton agrees to appropriate annually sufficient money, or so much thereof, as may be necessary to provide sufficient funds for the payment of the water furnished by the City hereunder. The Village of Dolton further agrees that it will at all times charge its water consumers sufficient rates in order to provide adequate funds for the payment of water furnished by the City.

All proposed water works improvements, which must be approved by the Commissioner of Water and Sewers of the City, shall be disinfected in accordance with the requirements of the Department of Water and Sewers of the City; and said water works improvements shall not be placed into service until approved as to sanitary quality by the City.

18. The City may adopt any protective or health measures it deems advisable or desirable for the benefit of its water consumers, such as the fluoridation of its water, in any manner that the Commissioner of Water and Sewers of the City shall see fit.

19. The Village of Dolton agrees to notify the Commissioner of Water and Sewers of the City as promptly as possible of all emergency and other conditions which may directly or indirectly affect the quality of the water received hereunder and the City’s water supply, and further agrees that the duly authorized engineers and inspectors of the City shall be allowed to make inspections and required tests of the quality of the water supply as received hereunder, as well as the quality of the water within the Village of Dolton distribution system.

20. The Village of Dolton agrees not to resell or permit any water furnished hereunder to be used to supply any other municipality or any consumer of water located or residing outside the territorial limits of the Village of Dolton except if and when it should be specifically authorized so to do by the City Council of the City.

21. The Village of Dolton agrees to use City water exclusively during the period of this contract.

24. To secure payment promptly of the water bills, the City shall have the right at any time to require the Village of Dolton to pay in advance a sum of money estimated by the Commissioner of Water and Sewers of the City to be equal to the cost of water required by the City’s water requirements for a period of ninety (90) days at the then prevailing metered rate, which said advance payment the Village of Dolton agrees to make upon demand.

25. The City shall not be responsible in damages for any failure to supply water or for interruption of the water supply. The Village of Dolton agrees to save and keep harmless the City from all damage to real and personal property occasioned or caused by the making of the water connection or connections herein referred to or caused by the furnishing of water hereunder, and shall also keep and save harmless the City from all damage of any kind, nature and description which may arise as the result of the making of this agreement.

26. The City reserves the right to its Commissioner of Water and Sewers to decide all questions arising as to the proper performance of this contract.

27. In furtherance and not in limitation of this contract, it is mutually agreed that all rights of the City and the Village of Dolton arising under the water supply contract, entered into on November 28, A.D. 1911, now in force and effect, and any rights and easements granted arising from the delivery of water shall be continued for the term of the said contract and this agreement.

28. The Village of Dolton shall in no case refuse, neglect or fail to pay promptly the water bills rendered for the water supplied it hereunder within the time or times prescribed by the ordinances of the City, or if the Village of Dolton shall fail to comply with or perform any of the conditions or obligations on its part to be complied with or to be performed hereunder, and if after such failure the City shall deliver at the Village Hall of the Village of Dolton, a notice in writing, addressed to the President of the Board of Trustees of the Village of Dolton, of its intention to shut off the supply to the expiration of five (5) days after the giving of such notice, and to terminate this contract unless within such five (5) days the Village of Dolton shall make good such failure. The shutting
of the supply of water for any such cause shall
not release the Village of Dolton from its obli-
gation to make payments of any amount or amounts
due or to become due in accordance with the terms
hereof.

29. No assignment or transfer of this agree-
ment shall be made by the Village of Dolton.

30. The Village of Dolton hereby waives any
defenses it may have by virtue of any governmen-
tal function it exercises in any action brought at law
or equity under the terms of this contract.

31. No officer, official or agent of the City has
the power to amend, modify or alter this agree-
ment or waive any of its conditions or to bind the
City by making any promise or representation not
contained herein.

32. The authority of the officials of the City
to execute this agreement is evidenced by the author-

published in the Journal of Proceedings of the City
Council for said date on Page(s) .................. thereof.

Be It Ordained by the City Council of the City of Chicago:

SECTION 1. That the Commissioner of Aviation and the City Comptroller, subject to the approval as to form and legality by the Corporation Counsel, are authorized to execute an Agreement by and between the City of Chicago, a municipal corporation, and National Rent-A-Car System, Inc., at Chicago Midway Airport, said Agreement to be in substantially the following form:

AGREEMENT.

This Agreement made this ___________ day of ___________. A.D. 19__... by and between the City of Chicago, a municipal corporation hereinafter called "Lessor", and NATIONAL RENT-A-CAR SYSTEM, INC., an ____________ corporation, hereinafter called "Lessee",

Witnesseth:

Whereas, Lessor owns and operates Chicago Midway Airport, situated in the County of Cook and State of Illinois, with the power to grant rights and privileges with respect thereto, all as hereinafter provided;

Whereas, Lessee desires to lease certain space to obtain certain rights and privileges with respect to the operation of a rent-a-car service at said Chicago Midway Airport, upon the terms and conditions hereinafter provided;

Now, Therefore, for and in consideration of the premises and other mutual covenants and agreements hereinafter contained, and other valuable considerations, the parties hereto agree as follows:

Lessor hereby grants to Lessee the privilege, in common with others, as may from time to time, be likewise so permitted, to operate on, upon and from Chicago Midway Airport a rent-a-car business for a period commencing on the ______________ day of ________________, A.D. 19__... and terminating on the 31st day of March, 1962, unless otherwise terminated, as hereinafter provided.

Notwithstanding any other provision hereof, the privilege hereby granted may be revoked at any time by Lessor without cost upon thirty (30) days' written notice. Unless sooner revoked, such privilege shall expire in any event upon the expiration date hereinbefore set forth. Revocation shall not relieve the Lessee of any liabilities or obligations hereunder which shall have accrued prior to the effective date of revocation.

Only in connection with the privilege herein granted, and for no other purpose, Lessor demises and lets to Lessee Sixty-Four (64) square feet more or less of space, as more particularly described in Exhibit 1, attached hereto and made a part hereof.

Lessee shall accept said space in its present condition and shall repair any damages thereto caused by its operations. Lessee shall not install any fixtures or make any alterations, additions or improvements or repairs in the space except with the written approval of the Commissioner of Aviation.

Lessee agrees to pay Lessor for the privilege herein granted a minimum sum of twenty-five thousand ($25,000.00) dollars per annum or ten per cent (10%) of the gross receipts, whichever is the larger (excluding truck rental revenue derived outside of the airport premises), derived from the operation of its business with persons, firms or corporations utilizing the airport facilities whether or not said person, firm or corporation has elsewhere reserved a vehicle from Lessee with delivery to be made on the premises of the Lessor within the Chicago area, or has reserved a vehicle on the airport premises and agreed to receive such vehicle outside the airport premises but within the Chicago area. Said payments shall be made at the office of the City Comptroller, City Hall, Chicago 2, Illinois, on or before the 10th day of the month succeeding each and every calendar month of the term, or portion thereof, for its operation of the preceding month. Lessee shall pay, in addition to the foregoing sums provided, all permit fees, license fees and taxes, if any, required by law and ordinance of the City of Chicago.

On or before the 10th day of the month succeeding each and every calendar month of the term, or portion thereof, Lessee shall prepare, in accordance with accepted accounting practices as approved or if found necessary in the sole determination of the City Comptroller, as determined by said City Comptroller, and deliver to Lessor a report which shall show the total gross receipts during the preceding month or portion thereof. Lessor is hereby given and granted the right at all reasonable times to examine the books and records of Lessee and to make copies and excerpts therefrom and to do anything that may be necessary to enable Lessor to make a full, proper and complete audit of all business transacted in connection with the airport.

The operations of the Lessee, its employees, invitees and those doing business with it, shall be conducted in an orderly and proper manner and so as not to annoy, disturb or be offensive to others at the air terminal.

The Lessor shall have the right to complain to the Lessee as to the demeanor, conduct and appearance of the Lessee's employees, invitees and those doing business with it, whereupon the Lessee will take all steps necessary to remove the cause of the complaint.

No signs, posters or similar devices shall be erected, displayed or maintained in view of the general public in or about the Space or elsewhere upon said Airport without the written approval of the Commissioner of Aviation, and any not approved by him may be removed by the Lessor at the expense of the Lessee.

The Lessor shall have the right at any time, and as often as it considers necessary, to inspect the Space and (without any obligation so to do) to enter thereon to make ordinary repairs, and in the event of emergency to take such action therein as may be required for the protection of persons or property.

Lessee shall not assign this Agreement without the consent in writing of Lessor and the approval of the City Council first had and obtained, nor permit any transfer by operation of law of its interest created hereby.

Upon termination of this Agreement by lapse of time or otherwise, Lessee shall promptly remove from said premises, upon demand in writing of Lessor so to do, all of its display signs, counters, and other equipment as may be designated in such written demand, cleaning up the debris and leaving...
said premises in a safe, sanitary and sightly condition.

Lessor shall not be liable to Lessee for any injury to, or death of any person, or for any damage to any property by Lessor, or any of its officers, agents, or employees in the maintenance or operation of said Terminal Buildings, or caused by any person using said Terminal Buildings, or navigating any aircraft over said Terminal Buildings, whether such injury, death, or damage is due to negligence or otherwise, all claims for any such injury, death or damage being hereby expressly waived by Lessee.

Lessee, at its own expense, shall keep in force insurance satisfactory to the City Comptroller for the protection of Lessor against liabilities, judgments, costs, damages and expenses which may accrue against, be charged to, or recovered from City, by reason of damage to the property of, injury to, or death of any person, or persons on account of any matter or thing which may occur in conjunction with the exercise of the privileges herein conferred, in policy types and amounts as may be determined in writing by the City Comptroller. Certificates of such insurance shall be delivered to and held by the City Comptroller.

Lessee agrees to charge rates only as may be approved from time to time by the Commissioner of Aviation, it being understood that such approval will not be withheld if the proposed rates do not exceed rates for similar services in the City of Chicago. Further, Lessee shall remain open and conduct business during such hours of the day and on such days of the week as may properly serve the interest of the public. Lessor's determination of reasonable rates and proper business hours and days shall control.

Lessee agrees that it shall not enter into any agreement of any nature, formal or informal, concerning premises or operations at Chicago Midway Airport, with any individual, partnership or corporation without the prior written approval of Lessor and the approval of the City Council; it being understood that subject to the foregoing the only activity that Lessee may conduct directly or indirectly, alone or through others, on, upon or from said Airport and properties located thereon, be they demised to others or under the control of Lessor, is only as authorized under the terms of this Agreement.

This lease does not constitute the Lessee the agent or representative of the Lessor for any purpose whatsoever.

The Lessee, its employees, invitees and those doing business with it, shall have no right hereunder to park vehicles within the air terminal beyond a reasonable loading or discharging time except in regular parking areas upon payment of regular charges therefor.

The Lessee shall, however, have the right to park, for no additional charge hereunder, approximately eight vehicles in the places provided for by the Lessor for the stand-by vehicles of the Lessee, said places to be located conveniently close to the counter space of Lessee provided for hereunder.

The Lessee shall not discriminate against any worker, employee or applicant for employment because of race, creed, color or national origin.

Execution of this Agreement authorized by ordinance of the City Council of the City of Chicago, passed ........................................... A.D. 19...... (C.J.p. ...........................................)

[Signature forms omitted]

Section X.
The work of altering, and maintaining the facilities covered by this agreement, at any time after they have been relocated by the City as herein provided, shall be done by the City at its sole expense. Such work of alteration or maintenance shall be interpreted to include all repairs and revisions necessary to maintain the facility so that it will not in any way interfere with or endanger the general public in their use of the road as a State highway. This shall not include adjustments or relocations which are necessitated by roadway changes or other construction on the part of the State.

Section XI.
That the City shall not start work on the adjustment and rearrangement of the facilities as herefore described in this agreement, until notice has
been given to the City by the State that the work has been authorized by the Bureau of Public Roads and/or by the State and that it is therefore satisfactory to begin work.

Records to this effect shall be available to the State and the Bureau of Public Roads at any time.

Section XIII.

It is also agreed by and between the parties hereto that the Bureau of Public Roads Policy and Procedure Memorandum 30-4 and amendments and supplements thereto form an essential part of this agreement, and the terms or provisions of this agreement shall in no way abrogate or supersede the terms or provisions set forth in the Policy and Procedure Memorandum 30-4.

Section XIV.

The State will reimburse the City for costs incurred for preliminary engineering. Preliminary engineering shall include all technical work including field surveys involved in the preparation of construction plans, specifications and estimates. Reimbursement for preliminary engineering shall be made for work performed by City forces on projects or portions of projects in which the State will participate or in which the State's contractor will perform the work.

Payment for preliminary engineering shall be made to the City for the actual cost of Engineering shown on an itemized statement of engineering time credited to the project, but in no case shall this amount exceed five per cent (5%) of the engineers estimated cost of construction. Payment for preliminary engineering will be made upon approval of the Statement for such work. This statement shall be submitted after completion of plans, specifications and estimates by City engineering forces.

Witnesseth:

Whereas, the COUNTY desires to make certain highway improvements on the Access Controlled Expressways which are coincident with the Federal-Aid Highway System consisting of projects for construction within the limits of the CITY; and

Whereas, that due to said highway construction, certain adjustments, removal and alteration of existing utilities will have to be made, and

Whereas, it is necessary for the parties hereto to comply with the applicable terms and provisions of the Bureau of Public Roads Policy and Procedure Memorandum 30-4 and supplements and amendments thereto in order to; (1) obtain Federal participation in the costs involved herein, and (2) to provide a standard procedure for evaluating project status, said Policy and Procedure Memorandum 30-4, and supplements and amendments thereto are by this reference hereby made a part of this agreement with the same force and effect as if attached hereto, or spread at length herein; and

Whereas, it is in the best interest of the CITY and the COUNTY for the CITY to make necessary removal alteration and adjustments of certain existing utilities with the CITY's regular construction and maintenance forces, and

Whereas, it is necessary for the CITY to be reimbursed for preliminary engineering involved in the preparation of construction plans for the removal, alteration and adjustment of existing utilities to be performed by CITY forces or by COUNTY's contractor;

Now, therefore, for and in consideration of the premises and mutual promises herein contained, the CITY and the COUNTY agree as follows:

Section I.

That the CITY will prepare plans and estimates for work to be performed by CITY forces in accordance with Sections 7a, 7h and 7i of the Bureau of Public Roads Policy and Procedure Memorandum 30-4. The CITY will submit these plans and estimates to the COUNTY prior to the proposed letting of CITY contracts in the area where CITY utilities are involved. The estimates submitted by the CITY shall be in three (3) separate parts setting forth that portion of the work in which 1) the Bureau of Public Roads and the STATE will participate, 2) that part in which the COUNTY will participate and 3) that part in which the CITY will bear the cost. Such estimates shall be prepared in accordance with Section 7e (2) of Bureau of Public Roads Policy and Procedure Memorandum 30-4.

Such notification shall be made prior to the performance of the work and shall be submitted to the COUNTY in the form of a written request for approval of said work. Justification for the proposed increases in work or material shall be stated in the request for approval. Increases in authorized work and extra work or material required to complete the adjustment must be approved by the COUNTY, STATE, and Bureau of Public Roads before proceeding with said work. Changes of this type shall be processed through the COUNTY. Verbal approval for such work, contingent on transmittal of written request or the earliest possible date, may be requested only in the case of an emergency in which the work delay incurred by the aforementioned procedure would be detrimental to the interest of the COUNTY, STATE, and the Bureau of Public Roads.

Section V.

The COUNTY will reimburse the CITY for the actual cost of all work performed for which the COUNTY is reimbursed through the STATE by the Bureau of Public Roads. This work is as follows:

A certification to the effect that the utility relocation does or does not cover a major and independent segment of the CITY's utility system shall be attached to the estimate of cost for each project.

Section IX.

That all cost records of the CITY pertaining to this project will be subject to inspection at any time by the representatives of the COUNTY and the Bureau of Public Roads.

Section X.

The work of altering, and maintaining the utilities covered by this agreement, at any time after they have been relocated by the CITY as herein provided, shall be done by the CITY at its sole expense. Such work of alteration or maintenance shall be interpreted to include all repairs and revisions necessary to maintain the utility so that it will not in any way interfere with or endanger the general public in their use of the road as a STATE highway. This shall not include adjustments or relocations which are necessitated by roadway changes or other construction on the part of the COUNTY.

Section XI.

That the CITY shall not start work on the adjustment and rearrangement of the utilities as heretofore described in this agreement, until notice has been given to the CITY by the COUNTY that the work has been authorized by the Bureau of Public Roads and/or by the COUNTY and that it is therefore satisfactory to begin work.

Section XII.

The COUNTY will designate an engineer, hereinafter referred to as the COUNTY's resident engineer to oversee the adjustments, removals and alterations made by the CITY's personnel. The number of personnel with their complete classification, the amount of material (quantity of units as outlined in the estimate) used and the type and number of equipment used, will be tabulated and presented to the COUNTY's resident engineer on a daily basis for his approval and verification. Records to this effect shall be available to the COUNTY and the Bureau of Public Roads at any time.

Section XIII.

Payment for preliminary engineering shall be made to the CITY for the actual cost of engineering shown on an itemized statement of engineering time credited to the project, but in no case shall this amount exceed five per cent (5%) of the engineers estimated cost of construction. **PORTLAND CEMENT CONCRETE PAVEMENT—GENERAL.**

Description. This item shall consist of a wearing course of Portland Cement concrete pavement, including longitudinal and transverse joints when required, constructed on the prepared subgrade in accordance with the specifications and the line, grades and cross-section shown on the plans and as required by the Engineer. Portland Cement concrete shall consist of a mixture of Portland Cement, fine aggregate, coarse aggregate, water and entrained air.

Composition of Concrete. Portland cement concrete shall have an air-entrainment of not less than three per cent nor more than five per cent of the volume of the concrete. The air-entrainment shall be obtained either by the use of air entraining portland cement or by the use of non-air entraining portland cement in connection with an approved air entraining agent added during the process of mixing the concrete.

The coarse aggregate shall be furnished in two gradations or separate sizes. The separated sizes shall be combined as herein provided. The proportions of cement, fine aggregate, coarse aggregate and water will be determined by the Engineer before the work begins, so as to produce a workable, plastic concrete having a minimum compressive strength of not less than 3500 pounds per square inch and a minimum modulus of rupture of not less than 650 pounds per square inch at the age of 14 days for Portland Cement concrete pavement and at the age of 3 days for rich-mix Portland Cement concrete pavement or highearly-strength portland cement concrete pavement when tested by the method specified herein. This determination shall be based on the tests for aggregates selected by the Contractor for use in the work. The quantities of aggregates for each batch of concrete shall be measured by weight.

The use of admixtures to increase the workability of the concrete will not be permitted. The use of admixtures to accelerate the hardening of the concrete will be permitted only when approved by the Engineer.

Forms shall be set on solid subgrade which has been rolled as specified and approved by the Engineer. All subgrade for forms shall be prepared by means of a form grader, or by other suitable means approved by the Engineer. If the subgrade after being prepared is more than ½ inch low, it shall be re-filled, re-rolled, and again cut to the required grade. This operation shall be repeated until a foundation for the forms is obtained that is satisfactory to the Engineer. Any variations which are less than ½ inch low, and all variations...
which are above grade, shall be corrected to true grade by cutting or filling. Any filling shall be compacted with a hand tamper weighing not less than approximately 0.6 pound per square inch of tamping surface.

Forms shall be staked by using not less than 3 pins for each 10-foot section. The length of pins shall be such as to maintain the forms at the correct line and grade. Form sections shall be neatly and tightly joined together by a locked joint free from play or movement in any direction.

Concrete shall be mixed in a batch type mixer. Mixing shall continue for a period of not less than one and one-quarter (1 1/4) minutes up to one (1) hour, or all the concrete in the cubic yards capacity, after all the materials are in the drum. The mixing time for rich-mix Portland Cement concrete pavement may be increased. The mixing time shall be extended, if necessary, to obtain the required uniform consistency. Any concrete mixed less than the specified mixing time shall be dumped outside the forms and shall be disposed of by the Contractor at his expense. The concrete shall be mixed only in the quantity required. Concrete which has been mixed longer than 30 minutes or which has developed initial set shall not be used. Retempering concrete by adding water, or by other means, will not be permitted.

The mixer shall operate at the drum speed for which it was designed. The batch shall be so charged into the drum that some of the water shall enter in advance of the aggregates. The flow of the water shall be uniform and all water shall be in the drum by the end of the first 15 seconds of the mixing period. The entire contents of the drum, or of each single compartment of a dual drum mixer, shall be discharged before the succeeding batch is introduced. The skip and throat of the drum shall be kept free of accumulations.

The use of ready-mixed concrete will be permitted, subject to conformance with the pertinent requirements of the specifications. Ready-mixed concrete shall be transported in truck mixers, or in truck agitators. Transportation by other means will be permitted only in specific cases, and then only upon written permission of the Engineer.

The use of a central mixing plant will be permitted for mixing concrete. The mixer shall be rotated at the rate recommended by its manufacturer. The mixing time shall be measured from the time that all cement and aggregates are in the mixer. The batch shall be so charged into the drum that some water shall enter in advance of the aggregates. The flow of the water shall be uniform and all water shall be in the drum by the end of the first 15 seconds of the mixing period. When the central mixing plant is used for the complete mixing of the concrete to be transported in an agitator truck, the mixing time for mixers having a capacity of one cubic yard or less shall be not less than one minute; for mixers of larger capacity, this minimum mixing time shall be increased at the rate of 15 seconds or more for each cubic yard, or fraction thereof, additional capacity.

Non-agitating trucks may be used for transporting the mixed concrete. The time elapsing from the addition of water to the mix until depositing in place at the site of the work shall not exceed 20 minutes when hauled in non-agitating trucks, or 45 minutes when hauled in truck mixers or agitator trucks. The vehicles used for transporting the mixed concrete shall be of such capacity, or the batches shall be so proportioned, that the mixer can discharge the entire contents of the drum into each vehicle load.

Transit Mixing. The size of the batch shall conform to the rated capacity as shown by the rating plate of the mixer. When the mixer is charged with fine and coarse aggregates simultaneously, not less than 50 or more than 100 revolutions of the drum or blades at mixing speed shall be required, after all of the ingredients including water are in the drum. When fine and coarse aggregates are charged separately, not less than 60 revolutions shall be required. Additional mixing beyond 100 revolutions, if any, shall be done at agitating speed. The mixing operation shall begin immediately after the cement and water, or the cement and wet aggregates, come in contact. The ingredients of the batch shall be completely discharged from the drum before the succeeding batch is placed therein. Drums and auxiliary parts of the equipment shall be kept free from accumulations of materials.

For shrink mixing, the mixing time at the central mixing plant may be reduced to a minimum of 10 to 15 seconds to intermingle the ingredients, and the mixing completed in a truck mixer. All ingredients for the batch shall be in the central mixer and partially mixed before any of the mixture is discharged into the truck mixer. The partially mixed batch shall be transferred to the truck mixer without delay and without loss of any portion of the batch, and mixing in the truck mixer shall start immediately. The mixing time in the truck mixer shall not be less than 50, nor more than 100 revolutions of the drum or blades at mixing speed. Units designed as agitators shall not be used for shrink mixing.

When central-mixed concrete is transported in a truck agitator or a truck mixer, the size of batch shall conform to the requirements for Ready-Mix. The agitating speed shall be not less than two (2) nor more than six (6) revolutions per minute of the drum or of the mixing blades. The central mixed batch shall be transferred to the agitating unit without delay and without loss of any portion of the batch. Agitating shall start immediately thereafter and shall continue without interruption until the batch is discharged from the agitator. The ingredients of the batch shall be completely discharged from the agitator before the succeeding batch is placed therein. Drums and auxiliary parts of the equipment shall be kept free from accumulations of materials.

Mixing water for both central mixing and transit mixing shall be measured by volume or by weight. The device for the measurement of the water shall conform to all the requirements for measuring water according to these specifications. The quantity of water used shall be the amount determined by the Engineer within the tolerance permitted for the measuring device. The full amount of mixing water shall be added in one operation.

Rinsing water, if used, shall be either completely discharged from the drum or container before the succeeding batch is placed therein, or if permitted as a portion of the mixing water for the succeeding batch shall be accurately measured in a separate tank provided for the purpose, and taken into account in determining the amount of additional mixing water required.

Slump. Slump tests shall be made at the option of the Engineer. If the measured slump fails outside the limits specified, a check test shall be made.
In the event of a second failure, the Engineer may refuse to permit the use of the batch of concrete represented. At the time of placement on the subgrade, the slump of the concrete discharged from the container shall conform to the article describing consistency.

Mixing Speeds. The mixing speed for the revolving drum type of truck mixer shall be not less than 4 revolutions per minute of the drum, nor greater than a speed resulting in a peripheral velocity of the drum of 225 feet per minute. For the revolving blade type of mixer, the mixing speed shall be not less than 6, nor more than 16 revolutions per minute of the mixing blade.

Agitating speed, for both the revolving drum and revolving blade types, shall be not less than 2, nor more than 6 revolutions per minute of the drum or of the mixing blades.

The volume of batch in the truck mixer or the truck agitator shall in no case be greater than such rated capacity determined in accordance with the Truck Mixer and Agitator Standards of the Truck Mixer Manufacturers' Bureau, as shown by the rating plate. If the truck mixer or truck agitator does not have a rating plate complying with these standards, the allowable capacity shall be determined by the Engineer on the basis of the interior gross volume of the drum.

For the purpose of determining the gross volume of the container of the revolving blade type of truck mixer or agitator, the height of the container above the center shaft shall be considered no greater than the radius of the circular section of the container below the center shaft, and the overall width shall be considered no greater than the diameter of the circular section.

Time of Haul. Concrete transported in truck mixers or truck agitators shall be delivered to the site of the work in a plastic and workable condition, satisfactory for placement in the work without the addition of water or water and cement prior to discharging.

Temperature Control. Ready-mixed concrete shall be mixed and protected in accordance with articles pertaining to Temperature Control and Protection from Low Temperatures.

Production and Delivery. The production of ready-mixed concrete shall be such that the operations of placing and finishing shall be continuous so far as the job operations require. The contractor shall be responsible for producing a concrete that will have the required consistency when delivered to the work. Concrete which is unsuitable for placement as delivered shall be rejected.

Placing Concrete. The concrete shall be deposited on the subgrade in successive batches in such manner as to require as little rehandling as possible, and distributed to such depth, that when consolidated and finished, the slab thickness required by the plans will be obtained at all points. Concrete mixed in a paving mixer at the site of the work shall be delivered to the subgrade directly from the mixer by means of a boom and bucket discharging device.

Any additional spreading required shall be done by means of equipment meeting the approval of the Engineer. Any portion of a batch of concrete which becomes segregated shall be thoroughly mixed with the main body of the batch during the process of spreading. The operation of depositing and spreading shall be continuous between transverse joints. If interruptions are necessary, a construction joint shall be made.

Concrete shall not be placed on a soft, muddy, or frozen subgrade. Concrete shall not be placed when the subgrade is frozen under adjacent pavement which is to remain in place. No concrete shall be placed around manholes or other structures until they have been brought to the required grade and alignment. Workmen shall not be allowed to walk in the concrete with boots or shoes covered with earth or other foreign substances.

When the pavement is to be struck off and consolidated, the concrete adjacent to both side forms shall be compacted with a vibrator to eliminate all honeycombed or porous areas in the pavement edges. The vibrator shall be inserted into the concrete and worked along the entire length of the forms before the finishing operations are initiated.

Longitudinal joints shall be formed by installing, as shown on the plans, metal parting strips of the gauge, shape and dimension of specific types of longitudinal metal joints shall not be continuous across any transverse joint, but shall begin or terminate at the transverse joint. When it is necessary to cut longitudinal metal joints in the field, the work shall be done only in materials approved by the Engineer. The metal strip shall be held securely in place, true to line and grade, by means of metal pins, within an allowable variation of 1/8 inch from the center line of the pavement. Adjoining sections shall be securely fastened together by lapping and pinning, or by other approved method. If lapped, the upper edges of the overlapping ends shall be in contact for the full length of the overlap. If other methods are used, the device for holding the ends together shall be approved by the Engineer.

The concrete shall be deposited in a manner which will not displace the metal strip. When the pavement is to be struck off and consolidated, the concrete adjacent to the longitudinal metal joint on both sides shall be compacted with a vibrator inserted into the concrete and worked along the entire length of the joint before finishing operations are initiated.

Transverse Construction Joints. Unless other prescribed joints occur at the same points, transverse construction joints shall be made at the end of each day's run, or when an interruption in the concrete operation of more than 30 minutes occurs, provided the length of the pavement laid from the last joint is 10 feet or more. Sections less than 10 feet in length will not be permitted.

The transverse construction joint shall be formed by means of a suitable headboard, accurately set and securely held in place in a plane perpendicular to the surface of the pavement. Dowel bars one inch in diameter, 18 inches long, and spaced at 13 1/2 inch centers of load transmission permitted for transverse joints shall be installed through the header board, with each bar extending 9 inches on each side of the face of the joint. Upon the resumption of concreting, the header board shall be carefully removed and any surplus concrete on the subgrade shall be cleared away, and the fresh concrete deposited directly against the old. When tested with a 10-foot straight-edge, the surface across the joint shall not vary more than 1/4 of an inch.

After the pavement is to be struck off and consolidated, the concrete adjacent to the transverse construction joint shall be compacted with a vibrator inserted into the concrete and worked along
the entire length of the joint before the finishing operations are initiated.

When the slab as a whole is not to be vibrated, the slump ordinarily shall be not less than one (1) nor more than two (2) inches. When the concrete is to be consolidated by vibration, the slump ordinarily shall be not less than three-quarters (¾) nor more than one and one-half (1½) inches. In each of the above cases, slumps outside of the limits named may be used when, in the opinion of the Engineer, satisfactory workability cannot be obtained within such limits.

Where mechanical finishing is used, if the rate of depositing concrete in the opinion of the Engineer, is in excess of the amount which the finishing machine can care, strike off and consolidate in full compliance with the specifications, a second finishing machine shall be provided and used.

The compacting and finishing operations shall at all times be such as to produce a satisfactory surface in accordance with the specifications.

Finishing operations shall be completed not farther than 250 feet back of the mixer, regardless of the speed or yardage produced per hour, if weather conditions permit.

**Strike-Off and Consolidation—Non-Vibratory Method.**

The concrete shall be distributed or spread as soon as placed. A mechanical concrete spreader of a type approved by the Engineer may be used. The concrete shall then be accurately struck off, screeded and consolidated with a non-vibratory finishing machine. The striking off and screeding shall conform to the crown and cross section shown on the plans, and shall be performed at such elevation slightly above grade that when properly consolidated and finished, the surface of the pavement will be as indicated on the plans, and free from porous areas.

When the width of pavement changes on curves, or at other points where it is impracticable to use a mechanical strike-off templet, hand methods may be employed, subject to the approval of the Engineer. In case of breakdowns or other emergencies, hand methods may be permitted at the direction of the Engineer, but only until repairs can be made.

A finishing machine shall be operated over each area of pavement as many times, and at such intervals, as may be necessary to obtain the required finish, and to leave the surface of uniform texture true to grade and contour. At least two trips will be required. Prolonged operation over a given area shall be avoided.

Segregated particles of coarse aggregate which collect in front of the screed shall be thrown outside of the forms or thoroughly mixed by hand with the mass of concrete already on the subgrade. Under no circumstances shall such segregated particles be carried forward by the finishing machine and pushed onto the subgrade in front of the mass.

The height of the mass of concrete pushed forward by the finishing machine on its initial trip shall be at least 3 inches uniformly along the full length of the front screed, but shall not exceed ¾ of the height of its vertical face. On succeeding trips, movement and uniform amount of concrete shall be carried in front of the screed for its entire length to fill all voids and keep the finished surface to the required crown and cross section. Care shall be exercised, and the operations of the machine so controlled as to prevent an excess of mortar and water from being worked to the top.

The top of the forms shall be kept free from the accumulations of concrete or mortar, and the travel of the machine or the forms maintained true without lift, wabbling, or other variations tending to affect the precision of the finish.

**Strike-Off and Consolidation—Hand Method.**

Concrete, as soon as placed, shall be approximately leveled and then struck off to the crown and cross section shown on the plans, and to such elevation above grade that when consolidated and finished the surface of the pavement will be at the elevation indicated on the plans. A strike board or tamping templet shall be provided for this work. The entire surface shall be tamped, and the tamping operation continued until the required compaction and reduction of surface voids is secured. In striking off, the templet shall be moved forward with a combined longitudinal and transverse shearing motion, moving always in the direction in which the work is progressing, and so manipulated that neither end is raised from the side forms during the striking-off process. A slight excess of concrete shall be kept in front of the cutting edge at all times during the striking-off operation.

The entire surface of variable crown pavement shall be struck off and consolidated, the workmen operating from suitable bridges if necessary. Workmen will not be permitted to walk in the concrete.

As soon as possible after the concrete has been struck off and consolidated, it shall be further smoothed and consolidated by means of a longitudinal float, using one of the following methods:

- **(Hand Method)** The longitudinal float, operated from foot bridges, shall be worked with a sawing motion, while held in a floating position parallel to the pavement center line, and passing gradually from one side of the pavement to the other. Movement ahead along the center line of the pavement shall be in successive advances of not more than ¼ the length of the float. Any excess water or soupy materials shall be wasted over the side forms on each pass.

- **(Mechanical Method)** The tracks on the mechanical longitudinal float on which the floating mechanism operates shall be accurately adjusted to the required crown. The float shall be accurately adjusted and coordinated with the adjustments of the finishing machine so that a small amount of mortar is carried ahead of the float at all times. The forward speed shall be adjusted so that on each transverse trip the float will lap the distance specified by the Engineer. The float shall pass over each area of pavement at least two times, but excessive operation over a given area will not be permitted. Any excess water or soupy material shall be wasted over the side forms on each pass.

After floating, any excess water and laitance shall be removed from the surface of the pavement transversely by means of a 10-foot straight-edge, or a long handled wood float. These two methods shall have preference in the order named, the first being used if conditions permit. Successive transverse passes of either tool shall be lapped ½ the length of the blade.

The use of the long handled wood float shall be confined to a minimum. It may be used behind the longitudinal float to correct surface unevenness not taken care of by the longitudinal float, but it shall not be used to float the entire surface of the pavement in lieu of, or supplementing, the use of the longitudinal float.

When strike-off and consolidation are done by the hand method, and the crown of the pavement will
not permit the use of the longitudinal float, the surface shall be floated transversely by means of the long handled wood float. Care shall be taken not to work the crown out of the pavement during the operation.

After the longitudinal floating has been completed and the excess water and laitance removed, but while the concrete is still plastic, the pavement surface shall be tested with a 10-foot straightedge. The straightedge shall be held in successive positions parallel to the pavement center line, in contact with the surface, and the whole area gone over from one side of the slab to the other as necessary. Advancement along the pavement shall be in successive stages of not more than \( \frac{1}{2} \) the length of the straightedge. Any depressions found shall be immediately filled with freshly mixed concrete, struck off, consolidated and refinished. High areas shall be cut down and refinished. The straight edge testing and refloating shall continue until the entire surface is found to be free from observable departures from the straightedge.

Final finish shall be obtained by the use of two (2) separate, double thickness burlap drags, at least four (4) feet wide and two (2) feet longer than the width of the slab under construction. The burlap shall be attached to a bridge riding on the pavement forms and shall be kept saturated with water while in use. The burlap shall be laid on the pavement surface and dragged in the direction that the pavement is being laid with approximately two (2) feet of its width in contact with the pavement surface. The burlap drag shall be kept clean and free from hardened concrete.

**Sawed Contraction Joints**

After the concrete has hardened, contraction joints shall be cut by means of a concrete sawing machine meeting the approval of the Engineer. The joints shall be cut to the dimensions shown on the special detail, "Detail of Sawed Contraction Joint," included in the plans and shall be placed at intervals of 100 feet, or at locations shown on the plans, or where designated by the Engineer. Contraction joints shall be cut directly over the center of the dowel bar assemblies at right angles to the center line of the pavement and perpendicular to the pavement surface.

Sawing shall not be performed earlier than six (6) hours nor later than thirty (30) hours after the concrete has been poured, unless otherwise directed by the Engineer.

It is anticipated that the construction and expansion of the concrete in the lane or lanes already poured in multiple lane construction may cause uncontrolled cracking in subsequent lanes prior to the sawing of the joints. If this condition should develop, it may be necessary to do a part of all of the sawing at night to prevent the uncontrolled cracking. The time of sawing of the joints, and the order in which the joints are to be sawed shall be determined by the Engineer. No extra compensation will be allowed for performing this work as specified.

Curing covering shall be removed from the pavement only at the location where a joint is to be cut. Only sufficient covering shall be removed to provide the necessary room for working at the location of the joint. As soon as the joint has been cut, the covering shall be replaced. In no case shall the top surface and edges of the pavement be left unprotected for a period of more than one-half \( \frac{1}{2} \) hour.

Water shall be sprayed on the saw blade at all times during the cutting. If necessary a suitable stationary guide shall be used to prevent side swaying of the machine to insure that the cut will be straight. Water shall be used, if necessary, to thoroughly clean the joint. All extraneous material, including free water, shall be removed from the joint opening by means of an air jet.

If, for any reason, it is not possible to saw any series of joints within 30 hours from the time the concrete is placed, the Contractor will be required to keep the entire pavement area involved covered with wetted burlap until the joints are sawed. Enough burlap to cover the maximum output in square yards of pavement for one day run shall be kept on the site of the work. Prior to placing the wetted burlap the curing covering shall be removed; the work involved shall be performed in such a manner that the top surface and the edges of the pavement will not be left unprotected for a period of more than one-half \( \frac{1}{2} \) hour.

Prior to opening the pavement to traffic, the joints shall be sealed with a cold material as specified by the provisions for cold applied ready-mixed concrete joint sealing compound.

The joint filler compound furnished and used shall be a cold applied, ready-mixed material consisting of a homogeneous blend of asphalt, rubber, inert filler and a suitable solvent or solvents. When installed in accordance with the manufacturer's recommendations and these specifications the material shall be a resilient, adhesive compound capable of effectively sealing properly cleaned joints in concrete pavements against the infiltration of moisture through repeated cycles of contraction and expansion, and which will flow from the joint or be picked up by vehicle tires, particularly at summer temperatures.

The compound furnished under this specification when tested in accordance with the methods hereinafter described, shall conform with the following requirements:

**Penetration:**

- At 77° F.: (As received) 150 g., 5 sec. not less than 275 (after evaporation of solvent) 150 g., 5 sec.—not more than 220.
- At 32° F.: (After evaporation of solvent) 200 g., 60 sec. not less than 100.

**Flow:**

- At 140° F., 5 hrs., not more than 0.5 cm.

**Bond:**

- There shall be no cracking of the filler of failure in the bond between the filler and the mortar test blocks during or at the end of five (5) cycles.

Just prior to filling the joints in the hardened concrete, each joint shall be thoroughly cleaned of all foreign material. This may be accomplished by the use of compressed air, or by flushing with a jet of water under pressure or by both methods. The joints shall be thoroughly clean and dry prior to installing the joint filling compound.

The joint filler compound covered by this specification shall be installed by means of a heavy duty air operated pump or other approved devices capable of continuously feeding the compound under pressure. It is recommended that the joint filler be supplied in 55-gallon drums, so that the pump can be placed directly in the drum. The pump, drum of material, and air compressor may be conveniently

Carried on a truck during the application. The joint filler shall be pumpable through 15-30 ft. oil resistance of not less than one-half inch inside diameter. The filling compound must be installed in such a way as to fill the joint opening, uniformly solid from the bottom to the top, and to a point approximately ¼ inch above the finished surface of the concrete, as directed by the Engineer in a neat and workmanlike manner.

The filling compound must be installed in such a way as to fill the joint opening uniformly solid from the bottom to the top and so that the final surface of the filling compound is flush with the surface of the adjacent pavement. To accomplish this, the filling compound shall be installed to a point approximately ¼ inch above the surface of the adjacent pavement or in a sufficient quantity so that upon evaporation of the volatile solvent the final surface of the filling compound will be flush with the surface of the adjacent pavement. This work shall be performed in a neat and workmanlike manner as directed by the Engineer.

Traffic shall not be permitted to use the road until 48 hours after the joint filling compound has been installed or until authorized by the Engineer. Before permitting the traffic to use the road, the superfluous joint filling compound shall be carefully removed so that the surfaces of the joint filling compound and the adjacent pavement are flush. Joint filling compound on the surface of the adjacent pavement shall be removed as directed by the Engineer.

The pavement shall be tested for trueness at the expiration of the required curing or protection period. The surface shall be tested by means of a ten (10) foot straightedge placed parallel to the center line of the pavement, parallel to the grade line, in each wheel lane, and touching the surface. Ordinates measured from the face of the straightedge to the surface of the pavement shall at no place exceed one-eighth (1/8) inch.

The surface of the newly laid pavement shall be wetted if it becomes dry before the curing material is placed. The water shall be applied as a fine spray so that it will not mar or injure the pavement surface.

The top and edges of the concrete slab shall not be unprotected for a period of more than one-half hour at the time the forms are removed.

Curing shall be accomplished by one of the methods described hereinafter.

Wetted Burlap Method. The blankets shall overlap 6 inches. At least two layers of wetted burlap shall be placed on the finished surface immediately after the concrete has hardened sufficiently to prevent marring of the surface, and shall be kept saturated with water for a period of not less than 72 hours from the time applied. The blankets shall be placed so that they are in contact with the edges of the slab and that portion of the material in contact with the edges shall be kept saturated with water.

Mat Curing Method. The mats shall be saturated with water and placed on the finished surface as soon as the concrete has hardened sufficiently to prevent marring of the surface, and shall remain in place for a period of not less than 72 hours. Mats without waterproofing covering shall be kept saturated with water; reason why mats with waterproof coverings fail to keep the concrete wet, additional water shall be applied, so that the concrete will be kept wet during the entire period the mat is on the surface. The blankets shall be placed so that the entire surface and both edges of the slab are completely covered.

Wetted Straw Method. The surface of the pavement shall be kept continuously wet for a period of approximately four (4) hours. In lieu of applying water to wet the surface, wetted burlap may be used if kept continuously wet for the same period. The surface of the pavement shall then be covered with clean loose straw, applied at the rate of not less than 6 pounds per square yard, and shall be saturated with water as soon as placed and kept saturated for a period of not less than 72 hours from the time applied. The edges of the pavement shall be banked with not less than 12 inches of straw, which shall be kept saturated with water during the curing period specified. If the straw covering becomes displaced, it shall be replaced immediately with the minimum thickness specified.

Upon completion of the required curing, the straw shall be removed and disposed of, so that the right of way is left in a neat and presentable condition.

Impermeable Paper Method. The surface of the pavement shall be covered with impermeable paper as soon as the concrete has hardened sufficiently to prevent marring the surface. The surface of the pavement shall be wetted immediately before the paper is placed. The blankets shall remain in place for a period of not less than 72 hours from the time applied. The blankets shall be lapped at least 12 inches end to end, and these laps shall be securely weighted with a windrow of earth or other approved method to form a closed joint; the same requirements shall apply to the longitudinal laps where separate strips are used to the longitudinal for curing the pavement edges except the lap shall be at least nine inches. The edges of the blanket shall be weighted securely with a continuous windrow of earth, to provide contact with the edges of the pavement. Any torn places or holes in the paper shall be repaired immediately by patches cemented over the openings, using bituminous cement having a melting point of not less than 150° F. The blankets may be reused, provided they are air-tight and kept serviceable by proper repairs. Any unit which in the opinion of the Engineer does not comply with this requirement shall be discarded.

A longitudinal plant shall be provided in the blanket to permit shrinkage, where the width of the blanket is sufficient to cover the entire surface and both edges of the pavement slab; the plant will not be required where separate strips are used for the pavement edges. Joints in the blanket shall be sewed or cemented together in such a manner that they will not separate during use.

The engineer may approve the use of other impermeable coverings, in lieu of impermeable paper, provided it has been shown through laboratory and field investigations, that the results obtained are at least as satisfactory as those obtained with impermeable paper.

Ponding and Wetted Earth Methods. The pavement may be cured by either the ponding or the wetted earth method only upon written permission of the Engineer. Approval shall be in writing and shall contain a specification for method to be followed.

When the average daily temperature is below 50° F., curing by the above methods shall be omitted, and the newly laid pavement shall be protected with loose dry straw.

Removing Forms. Forms shall not be removed from freshly placed concrete less than 12 hours.
They shall be so removed that no damage will be done to the edges of the pavement.

As soon as the forms have been removed, any concrete or mortar shall at once be cleaned from the ends of all transverse expansion joints. Any honeycombed or porous areas shall be corrected as directed by the Engineer. Effective surface drainage shall be provided and maintained to prevent the accumulation of water along the edges of the pavement. Underwash along the edges shall be prevented, where grades are such as to cause this action, by placing earth against the edges to the full height of the slab.

Except in specific cases, when otherwise permitted by the Engineer in writing, the following requirements shall be observed:

(a) Concrete may be placed when the air temperature in the shade and away from artificial heat is above 45° F. or is between 40° F. and 45° F. and rising.

(b) Concrete shall not be placed when the air temperature is below 40° F. or is between 40° F. and 45° F. and falling.

(c) If the aggregates contain frost or lumps of frozen material, or if the temperature at any time during the 10 hours previous to the placing of the concrete has been 32° F. or less, the aggregate and water shall be heated to a temperature of not less than 70° F. nor more than 150° F. before being placed in the mixer.

(d) The temperature of the concrete in the drum of the mixer shall not be less than 60° F. nor more than 100° F.

Protection from Low Temperatures. When the average daily temperature is below 50° F., the newly laid pavement shall be protected with not less than 12 inches of loose dry straw, which shall remain in place for 10 days. When the minimum temperature is below 35° F. at any time during the first 5 days of the curing period, not less than 12 inches of loose dry straw shall be placed immediately as a protection and shall remain on the pavement for 10 days.

After the 15th day of September, there shall be available on the work sufficient clean dry straw to cover at least two days' production of the mixer. Additional straw shall be provided if needed to afford the protection required by these specifications.

The Contractor shall be responsible for the quality and strength of the concrete laid during cold weather, and any concrete injured by frost action shall be rejected, and shall be removed and replaced.

Opening to Traffic. The pavement shall be closed to traffic for a period of not less than 14 days after the concrete is placed, or longer if in the opinion of the Engineer weather conditions make it advisable to extend this time. The Engineer, however, reserves the right to open the pavement to traffic prior to the expiration of the 14 day period on the basis of tests made where a rich mix or high-early-strength concrete is used.

Portland Cement shall be ground so that the fineness expressed in specific surface area as square centimeters per gram of cement as determined by the Wagner turbidimetric test shall give an average value of sixteen hundred (1600) for all samples tested and a minimum of fifteen hundred (1500) for any one sample.

The cement shall have such qualities that when a one (1) inch (1") by one inch (1") cube of said neat cement is tested for soundness by the autoclave method, the per cent change in length of test specimen shall not exceed 0.50.

The cement shall not develop initial set in less than forty-five (45) minutes and final set in not more than ten (10) hours as determined by the Vicat Needle.

The average compressive and tensile strength in pounds per square inch of not less than three (3) each standard mortar cubes and briquettes composed of one (1) part cement and two and seventy-five (775) parts graded standard Ottawa sand and one (1) part cement and three (3) parts standard Ottawa sand respectively by weight with proper amounts of water shall be equal to or higher than the following:

Samples of cement proposed to be used in the work shall be submitted to the Board of Local Improvements in such quantities and at such time and place as will enable the said Board of Local Improvements to make all required tests. The cement to be used in this improvement shall be delivered in approved paper or cloth sacks or in bulk and information regarding the name and brand or stamp of the manufacturer shall be plainly visible on the bags or contained in the shipping advisories accompanying bulk shipments. The cement shall be stored in such manner as to permit easy access for proper inspection and identification of each shipment, and in a suitable weathertight building that will protect the cement from dampness and warehouse set.

A ninety-four (94) pound bag of portland cement will be assumed to measure one (1) cubic foot by dry rodded volume.

Uniformity of Color. Gray portland cement contained in single cars or in shipments of several cars to the same project shall be uniform in color. Visible difference in the color shall be cause for rejection.

Mixing Brands and Types. Different brands or different types of cement from the same mill, or the same brand or type from different mills shall not be mixed or used alternately in the same item of construction unless authorized by the Engineer.

Storage. The Contractor shall not store cement at the site of the work unless absolutely necessary. If conditions are such that cement must be stored, it shall be stored in a weather-tight building in such manner that it will be protected from dampness. It shall be piled so as to permit easy access for inspection and identification. Different brands or different types of cement from the same mill, or the same brand or type from different mills shall be kept separated.

Quality at Time of Use. At the time the cement is used in the work, it shall meet with all of the requirements of the specifications. The right is reserved to retest all cement which has been stored at the site of the work before it is used. If it shows retrogression in strength or setting properties or has become lumpy, caked or hardened, it shall not
be used. The use of cement salvaged from discarded or used bags will not be permitted.

Sampling and Testing. The right is reserved to sample the cement either at the origin of the shipment or after delivery at the site of the work. If sampling at the origin is undertaken, the Contractor and vendor agree to furnish, without charge to the Board of Local Improvements, such facilities as are required to perform the work and also the necessary personnel to assist in locating cars that have been closed or switched, open and close the car doors, and secure and transport samples to the place where they are prepared for shipment to the laboratory.

The Board of Local Improvements shall be notified sufficiently in advance of shipment to permit sampling. All testing shall be done at the laboratory.

The Engineer may permit the use of the cement pending the results of the test specified herein, provided the record of previous tests from the cement mill furnishing the cement has been consistently satisfactory. Such provisional acceptance of the cement, however, will be permitted only so long as all cement shipped meets the requirements of the specifications. In case of failure to do so, provisional acceptance shall be discontinued and thereafter all tests, including the 7-day strength tests, shall be completed on each car of cement from such mill before said cement is used in construction work, which procedure shall be continued until the mill has again shown, by actual tests, that the cement produced will meet the requirements of the specifications. The Contractor shall assume the entire cost of any delay or damage which results because of the withdrawal of the provisional acceptance of cement from the source which he has selected.

Provisional acceptance prior to the completion of tests shall in no way act as a waiver of the right to reject cement which has been shipped and not used, if upon completion of the tests it fails to meet the requirements of the specifications.

Water.

Quality. Water used with cement in concrete or mortar, and water used for curing concrete, shall be clean, clear, free from sugar, and shall not contain acid, alkali, salts, or organic matter in excess of the following amounts:

(a) Acidity and Alkalinity

(1) Acidity—0.1 Normal NaOH 2 ml. Max.*

(2) Alkalinity—0.1 Normal HCl 10 ml. Max.*

*To neutralize 200 ml. sample

(b) Total Solids

(1) Organic .................................0.02% max.

(2) Inorganic ...............................0.30% max.

(3) Sulphuric Anhydride (SO₃) 0.04% Max.

(4) Alkali Chloride as sodium chloride (NaCl) ....................0.10% max.

When standard 1:3 mortar briquettes made with cement, sand, and water from the sample are compared with briquettes made with the same cement and sand and distilled water, there shall be no indication of unsoundness, marked change in time of set, or variation of more than 10 per cent in strength.

Water which has been approved by the Board of Health Department for drinking or ordinary house-
be withheld until tests satisfactory to the Engineer have been made to determine whether the difference in color is indicative of the presence of injurious deleterious substances. The fine aggregate shall be of such quality that when made into a mortar and subjected to approved mortar strength tests, it shall develop compressive strengths at 7 and 28 days of less than 100 per cent of those developed by a mortar prepared in the same manner with the same cement and grade of standard sand having a fineness modulus of 2.40 ± 0.10.

(d) Gradation. Fine aggregate for Portland cement concrete, white concrete and mortar shall be uniformly graded from coarse to fine and when tested by means of laboratory sieves (square openings), shall conform to the following limits:

<table>

</table>

(b) Unit Weight of Slag. Crushed slag shall weigh not less than 70 pounds per cubic foot.

(c) Percentage of Wear. When the coarse aggregate is tested by the "Standard Method of Test for Abrasion of Coarse Aggregate by the Use of Los Angeles Machine," the percentage of wear shall not exceed 35.

(d) Soundness. When the coarse aggregate is subjected to 5 cycles of the sodium sulphate soundness test, the weighted average loss shall not be more than 15 per cent. Coarse aggregate failing to meet the above requirements may, at the option of the Engineer, be subjected to the freezing and thawing test, and may be accepted provided the weighted average loss at the end of 50 cycles does not exceed 15 per cent.

(e) Gradation. The gradations given herein cover the sizes and maximum permissible ranges in sieve analyses for the coarse aggregates used in the construction of concrete pavements and structures. The sizes prescribed may be manufactured by any suitable commercial process and by the use of any sizes or shapes of plant screen openings necessary to produce the designated sizes within the limits of the sieve analysis specified. The gradation limits shown below represent the limits which shall determine suitability for use from all sources of supply. The gradation of the material from any one source shall be reasonably uniform and shall not be subject to the extreme percentages of gradation represented by the maximum and minimum limits for the various sieve sizes. The sizes given below are based on the use of square opening sieves in making sieve analyses.

(f) Combining Sizes. Coarse aggregate for Portland cement concrete pavement and base courses shall be furnished in the two separated sizes shown above. Each size shall be stored separately and care shall be taken to prevent them being mixed until they are ready to be proportioned. The engineer reserves the right to determine as the work progresses the proportions of the separated sizes of coarse aggregate which combined with fine aggregate, cement and water in accordance with these specifications will produce the most workable mixture. The contractor will be permitted to mix more than two sizes of coarse aggregate, provided the separated sizes selected and the proportions used in combining them are approved by the Engineer and that separate compartments are provided to proportion each size.

(g) Mixing Gravel. Crushed Gravel and Crushed Stone. Crushed stone coarse aggregate in one size and gravel or crushed gravel coarse aggregates in the other size may be combined, but the use of alternate batches of gravel, crushed gravel and crushed stone of any one size will not be permitted. Coarse aggregates of any one size from different sources shall not be mixed without permission of the Engineer.

D-6. Pavement Longitudinal Metal Joint, Pins, and Bar Supports. Longitudinal metal joint for
pavement, pins for installing the joint, and supports for bars in pavement shall meet the following requirements:

(a) Longitudinal Metal Joint. The joint shall be of sheet steel of the form, gauge and dimensions shown on the plans. The joint shall be furnished in sections not less than 10 feet nor more than 15 feet in length. Punched holes for the vertical pins for installing the joint and for the transverse bars shall be provided as called for on the plans.

Sections of joint made by riveting or spot welding not more than two pieces of metal together will be accepted on written approval of the Engineer. In such cases, the two pieces of metal must be of the same thickness and rigidly joined by welding or with not less than four rivets so that the entire length is straight and true.

(b) Pins. Pins for installing the longitudinal metal joint shall be of sheet steel pressed in a channel shape and of a length sufficient to support the longitudinal metal joint in place. The metal shall not be less than 16 gauge U. S. Standard (0.0625 inch), and shall be of a size to fit exactly the punched holes in the joint, so that when driven, a tight, snug fit will be obtained.

(e) Condition of Surface. At the time of shipment, the surface of all reinforcement bars and fabric reinforcement shall be free from loose mill scale, dirt, oil or grease, or other foreign substances. A light coating of rust, which may form during storage under acceptable conditions at the mill or warehouse, will not be deemed cause for rejection. Stocks of reinforcement bars or fabric, either at the mill or warehouse, which have not been protected in an adequate manner during storage, will not be accepted.

At the time the bars or fabric are placed in the work, they shall be free from rust which pits the surface or scales off, dirt, oil, or grease, or other foreign substances. A light coating of rust, which may form during storage on the work under acceptable conditions, will not be deemed cause to require cleaning.

The premoulded joint filler shall not contain wood in ground form or otherwise, nor coarse fragments of any description, and the presence of straw or cornstalks used as a substitute for felt or the presence of large particles of slate or other foreign matter will be deemed sufficient cause for rejection.

The premoulded joint filler shall comply with the following requirements:

(a) Asphalt, not less than .........................70.0%
(b) Felt ..................................................8.0% to 15.0%

Mixers having dual mixing drums or approved design may be used. The Mixer shall be equipped with boom and bucket delivery and the bucket shall be so constructed that it will distribute the concrete over the entire subgrade in a uniform and satisfactory manner.

The mixer shall be equipped with a batch meter for counting the batches, and an approved timing device which will automatically lock the discharge lever during the full time of mixing and release it at the end of the mixing period. The timing device shall be equipped with a bell, adjusted to ring each time the lock is released. If the timing device becomes broken or out of order, the Contractor will be permitted to operate while it is being repaired, provided he furnishes an approved time piece equipped with minute and second hands, and provided further that each batch is mixed the required number of minutes. If the timing device is not placed in good working order within 72 hours, further use of the mixer shall be prohibited until repairs are made.

The mixer shall be equipped with a water measuring device which shall be capable of measuring and discharging the specified amount of water within a limit of accuracy of one per cent, and shall be so arranged that the accuracy of measurement will not be affected by variation in pressure in the water supply line. A water glass placed vertically on the water tank shall not be used as a water measuring device. The water measuring equipment shall include an auxiliary tank of approved design from which the water measuring tank shall be filled. The volume of the auxiliary tank shall be not less than the volume of the measuring tank. The equipment shall be so arranged that the water pressure in the measuring tank cannot exceed that due to the difference in elevation between the two tanks. The measuring tank shall be equipped with an outside tap and valve to provide for checking the graduation on the indicator, unless other means are provided for readily and accurately determining the amount of water in the tank. Means shall be provided to automatically stop the flow of water from the measuring tank when the desired quantity has been delivered. The type of equipment shall be such that the quantity of water delivered shall not be affected by tilting the mixer in any direction. There shall be no leakage, and if the water measuring equipment fails to deliver the proper quantity of water due to the mechanical condition of the equipment, the operation of the mixer shall be suspended until repairs have been made.

Pick-up and throw-over blades in the drum of the mixer which are worn down ½ inch or more in depth shall be replaced with new blades.

(b) Truck Mixer. Truck mixers shall be either the type having a closed watertight revolving drum, suitably mounted and fitted with adequate blades attached to the drum, or the type having an open-top watertight trough-like container, suitably mounted and fitted with adequate blades revolving about an axis parallel to the axis of the trough. Truck mixers shall be capable of combining aggregates, cement, and water into a uniform mixture, and of discharging the mixture without segregation. Each truck mixer shall have attached to it a metal plate on which is stated its capacity in terms of volume of mixed concrete for the various uses to which the equipment is capable.

Truck mixers except when used exclusively for agitating premixed concrete, shall be provided with a batch meter and locking device capable of preventing the discharge of the concrete before the required number of revolutions has been obtained, or with an approved revolution counter, suitably mounted, to provide a means of verifying the amount of mixing obtained.

The water measuring device shall be capable of measuring and discharging the specified amount of water within a limit of accuracy of one per cent. If the water is added during transit, the measuring device may be mounted upon the truck mixer, and the tank shall be provided with an outside tap or valve to provide for checking the graduation on the indicator, unless other means are provided for readily and accurately determining the amount of mixing water in the tank. If not mounted on the truck mixer, the water measuring device shall be located at the site selected for adding the water. A water glass placed vertically on the water tank shall not be used as a water measuring device.

E-2. The equipment for weighing and batching the materials for truck mixing shall comply with Standard Weighing Device:

(a) Truck Agitator. Truck Agitators shall be either the type having a closed watertight revolving drum, suitably mounted and fitted with adequate blades attached to the drum, or the type having an open-top, watertight, trough-like container, suitably mounted and fitted with adequate blades revolving about an axis parallel to the axis of the trough. The truck agitator, when fully loaded, shall be capable of maintaining the mixed concrete in a thoroughly mixed and uniform mass, and of discharging the concrete without segregation. The agitator shall transport and discharge the concrete without leakage of any of the ingredients. Each truck agitator shall have attached to it a metal plate on which is stated its capacity in terms of volume of mixed concrete for various uses to which the equipment is applicable.

Final Inspection. The Engineer will make final inspection of all work included in the contract. If the work is not acceptable to the Engineer at the time of such inspection, he shall inform the Contractor as to the particular defects to be remedied before final acceptance can be made.

Board of Local Improvements within ten (10) days
after the Board shall have mailed notice to do so
to the Contractor at the last known address of said
Contractor, and shall complete said repair or re-
placement without delay; provided, however, that
except in cases of public urgency, the Board of
Local Improvements shall not require repair or re-
placement to be made during the months of Decem-
ber, January, February and March. The Contractor
shall notify the Board of Local Improvements, at
least two (2) days before beginning any repair or
replacement of said improvements, of the location
of and the time of doing such work.

cent of the maximum possible density of a voidless
pavement composed of the same materials in like
portions.

Concrete crosswalks shall be built at intersections
only. Concrete crosswalks shall be built according
to the Standard City Code of the City of Chicago.

The concrete shall conform to Class X Concrete
(as described in this ordinance for curbs and gut-
ters).

All existing catchbasins which are to be aban-
doned are located at the intersections of streets.
Where existing catchbasins are to be abandoned
the outlet pipe connection from the catchbasin to
the sewer shall be plugged and properly sealed and
the corbel courses broken down and the catchbasin
cleaned and filled with suitable material.

Additional masonry where necessary.

sary.

Said work is to be done in a workmanlike manner
under the superintendence of the Board of Local
Improvements of the said City of Chicago.

Section 2. That the recommendation of the
Board of Local Improvements of the City of Chi-
cago, providing for said improvement, together with
the estimate of the cost hereof, including the lawful-
expenses attending the same, made by the engi-
neer of said Board, both hereto attached, be and
the same are hereby approved.

provement in accordance with Section 84 of said
Act, shall be applied toward the payment of the
cost of making, levying and collecting said special
assessment, and of letting and executing contracts,
advertising, clerical hire, engineering and inspec-
tion, court costs and deficiency in interest in the

ordered to be assessed against the property, and
also the assessment on each lot and parcel of land
therein assessed shall be divided into five (5) in-
stallments in the manner provided by the statute
in such cases made and provided, and each of said
installments shall bear interest at the rate of five

cepting such part, if any, that is chargeable to the
City of Chicago for public benefits to public lands),
bonds shall be issued payable out of said install-
ments bearing interest at the rate of five (5) per
centum per annum, payable annually, and signed by
the Mayor and by the President of the Board of
Local Improvements, countersigned by the City
Comptroller and attested by the City Clerk under

(10) If at any time the said meter or meters shall fail to register correctly the quantity of water furnished and taken hereunder, or shall fail to register the flow of water, the said meter or meters, the unregistered, underregistered or overregistered amount of water furnished and taken shall be determined by taking an average of the twelve (12) preceding readings of such meter or meters, excluding the readings. Where said meter or meters have been installed for a period of less than one (1) year or where less than twelve (12) competent readings exist, such average or estimate may be based upon a lesser number than twelve (12) readings taken preceding or subsequent to such incorrect or stopped registrations. The failure, neglect or refusal on the part of the Village to make promptly and properly such changes in its piping, to maintain tightness, or to eliminate undesirable connections upon notice in writing so to do from said Commissioner of Water and Sewers, shall furnish sufficient ground for the City to shut off the water and discontinue the service hereunder until changes and corrections in said piping or connections required by the City are made by the Village.

(15) The Village agrees to prevent excessive use and waste of water.

(16) The Village agrees to appropriate annually sufficient money or so much thereof, as may be necessary, to provide sufficient funds for the payment of the water furnished by the City hereunder. (31) No assignment or transfer of this agreement shall be made by the Village.

(32) The Village hereby waives any defenses it may have by virtue of any governmental function it exercises in any action brought at law or equity under the terms of this contract.

Authority Granted for Execution of Agreement and Lease with American Airlines, Inc. for Construction of Extension to North Terminal Building at Chicago Midway Airport.

The Committee on Finance submitted a report recommending that the City Council pass a proposed ordinance transmitted therewith, to authorize execution of an agreement and lease with American Airlines, Inc. for construction of an extension to the North Terminal Building at Chicago Midway Airport (which proposed ordinance was referred to the committee on April 27, 1960).

On motion of Alderman Keane the committee's recommendation was concurred in and said proposed ordinance was passed, by yeas and nays as follows:

**Nays—** None.

The following is said ordinance as passed:

**Be It Ordained by the City Council of the City of Chicago:**

**Section 1.** That the Commissioner of Aviation be authorized to execute on behalf of the City of Chicago, upon the approval of the Corporation Counsel as to form and legality, an agreement and lease by and between the City of Chicago and American Airlines, Incorporated, providing for the construction of an extension to the North Terminal Building at Chicago Midway Airport. The said agreement is to be substantially in the following form, including the exhibit incorporated therein by reference:

**AGREEMENT.**

This Agreement made and entered into, this...... day of .................., A. D. 1959 by and between the City of Chicago, a municipal corporation of the State of Illinois (hereinafter designated “Lessor”), and American Airlines, Inc., a corporation organized and existing under and by virtue of the laws of the State of Delaware (hereinafter referred to as “Lessee”):

**Witnesseth:**

Whereas, Lessor holds under lease with power to grant rights thereto the Chicago Municipal Airport known as “Chicago Midway Airport” lying within the City of Chicago, in the County of Cook and State of Illinois; and

Whereas, Lessee under lease with Lessor presently occupies certain space and premises situated in the North Terminal Building at Chicago Midway Airport; and

Whereas, Lessee is desirous of leasing additional space in order to enlarge its operations and terminal facilities and to otherwise improve the said premises;

Now, Therefore, in consideration of the rents, covenants and agreements contained herein the parties hereto do hereby mutually contract, covenant and agree, each with the other, as follows:

1. Lessor does hereby lease and demise unto Lessee an area encompassing 1,400 square feet located adjacent to its presently occupied space in the North Terminal Building, to be occupied and used by Lessee as an extension of its operations and passenger terminal facilities, all as outlined in Exhibit "A" attached hereto and made a part hereof.

Upon completion of the said extension, it shall be and remain the property of the Lessor.

2. This Agreement, unless sooner terminated or hereafter renewed or extended as provided herein, shall continue in effect until December 31, 1964.

3. Commencing on the first day of its occupancy of said extension, as determined pursuant to paragraph 5 hereof, the lessee agrees to pay as rental for said extension:

   (a) an annual sum of Three Thousand Three Hundred Sixty Dollars ($3,360.00) predicated upon a rental of $2.40 per square foot per annum;

   (b) payment of the said rental shall be made in advance at the office of the City Comptroller in equal monthly installments on or before the 15th day of each calendar month throughout the term of this Agreement;

   (c) the initial payment shall be prorated, if necessary, and paid upon the first day of its occupancy of the new extension.

Lessee shall have the option to renew or extend the term of this Agreement for a period ending December 31, 1971 at an annual rental of Four Thousand Six Hundred Twenty Dollars ($4,620.00) predicated upon a rental of $3.30 per square foot per annum, provided, that the lease currently in effect with the Board of Education of the City of Chicago covering the airport as in effect at the time of the exercise of said option does not require the lessor to make rental payments during the calendar year 1965 (1) in an amount greater or less than the rental payments for the calendar year 1964, or (2) on a basis less favorable or more favorable than that in effect during the calendar year 1964.

The foregoing option may be exercised by written notice from lessee to lessor of election to renew or extend, delivered to lessor at any time prior to
six months before the expiration of this Agreement; provided, however, that if rental payments to be made by lessee to the Board of Education of the City of Chicago for the year 1965 have not been determined at least ten (10) days before the right of election expires, the original term of this Agreement shall be extended to a period expiring six months following date lessor notifies lessee of amount of rental payments to be made by Lessor to Board of Education for 1965; in such case the lessee's election to renew or extend the term if exercised, must be delivered to the lessor within ten (10) days of notification to lessee; it being understood that if the original term is extended the rental during such extended period shall be computed at a rate of $3.30 per square foot per annum.

4. Lessee shall be deemed to have commenced occupancy of the extension upon the date, as determined by the Commissioner of Aviation, that said extension is first used in connection with lessee's business activities.

5. Lessee shall expend approximately Twenty-one Thousand Four Hundred Fifty Dollars ($21,450.00) for the erection and completion of the said extension.

6. Lessee shall cause detailed plans, estimates of cost and specifications of the extension to be prepared by a competent architect acceptable to and approved by the Commissioner of Aviation of lessor. All such plans, specifications and estimates of cost for construction of the extension, prior to commencement of work, shall be approved by the Commissioner of Aviation in writing, and thereafter no changes may be made in said plans, estimates of cost and specifications by either party without the written consent of the Commissioner of Aviation.

7. The construction contract shall be awarded by lessee to a competent contractor or contractors, fully experienced in such work and having adequate equipment, organization and finances to do the work efficiently and in a manner satisfactory to the Commissioner of Aviation of lessor. Such awards shall be subject to the approval of the said Commissioner of Aviation.

All construction affecting the operation of the Chicago Midway Airport shall be performed in such a manner and at such times as shall be satisfactory to said Commissioner of Aviation in order to minimize the interference with airport operations. Construction contracts shall provide that all ordinances, rules and other regulations of lessor governing construction and operation of Chicago Midway Airport shall be complied with.

8. Subsequent to awarding contracts and prior to work commencing on said extension, a conference shall be held between the Commissioner of Aviation, lessee, representatives of the Administrator of Civil Aeronautics and interested contractors and subcontractors, at such time and place as is designated by the Commissioner of Aviation, in writing; at such meeting the schedule of operations shall be agreed upon.

The erection and location of temporary structures, the placing and location of machinery, equipment, material and rubbish upon Airport and its streets, areaways, sidewalks, driveways, parking lots and public property adjacent, shall be subject to approval obtained in advance from the said Commissioner of Aviation.

Lessee shall require its contractors and subcontractors to remove from the construction area all their machinery, equipment, surplus material, rubbish or temporary structures and to leave the premises upon which construction operations were performed in a neat condition satisfactory to the Commissioner of Aviation.

9. In connection with the work to be performed by lessee hereunder, said lessee shall not permit its contractor or subcontractors to commence work until such contractor or subcontractors furnish evidence to the lessee that the insurance has been obtained and bonds indemnifying both lessor and the lessee against any and all liability by reason of accident, injury or death to any one person including lessee's employees, or lessor's employees, contractors, subcontractors and the public generally, of the following kinds and amounts in such form and with an insurer acceptable to lessor:

(a) Bond in the full amount of the contract price, guaranteeing satisfactory performance and completion of the work and fulfillment of the contract.

(b) Workmen's Compensation insurance.

(c) Regular Contractors' Public Liability insurance, providing for a limit of not less than One Hundred Thousand Dollars ($100,000.00) for all damages arising out of bodily injuries to or death of one person, and, subject to that limit for each person, a total limit of Three Hundred Thousand Dollars ($300,000.00) for all damages arising out of bodily injuries to or death of two or more persons in any one accident and regular Contractors' Property Damage Liability insurance providing for a limit of not less than Fifty Thousand Dollars ($50,000.00) for all damages arising out of injuries to or destruction of property in any one accident and, subject to that limit per accident, a total (or aggregate) limit of Three Hundred Thousand Dollars ($300,000.00) for all damages arising out of injury to, or destruction of property during the period of construction. If any part of the work is sublet, the lessee shall require that insurance with the above mentioned limits shall be provided by or in behalf of the subcontractors indemnifying the contractor, the lessor and the lessee to cover their operations.

(d) Regular Owners' Contingent Public Liability Insurance providing for a limit of not less than One Hundred Thousand Dollars ($100,000.00) for all damages arising out of bodily injuries to or death of one person and subject to that limit for each person a total of Three Hundred Thousand Dollars ($300,000.00) for all damages arising out of bodily injuries to or death of two or more persons in any one accident, and regular Owners' Contingent property Damage Liability insurance providing for a limit of not less than Fifty Thousand Dollars ($50,000.00) for all damages arising out of injury to or destruction of property in any one accident, and subject to that limit per accident, a total (or aggregate) limit of Three Hundred Thousand Dollars ($300,000.00) for all damages arising out of injury to or destruction of property during the period of construction in behalf of the lessor.

10. Lessee agrees to indemnify and hold lessor harmless from and against all liability, judgments, costs, damages and expenses which may accrue against, be charged to or recovered from lessor by reason or on account of damage to the property of lessor or the property of, injury to or death of any person, arising from lessee's use and occupancy of the Addition under any circumstances except when
caused by lessor's sole negligence or by the joint negligence of lessor and any person other than lessee.

Lessees further agrees that after completion of construction and unless such requirement on its part is waived by the Comptroller of lessor, it will at its own expense keep in force insurance policies in standard form issued by a company or companies acceptable to the lessor naming lessor assured covering any accident arising from lessee's use and occupancy of the Addition under any circumstances except when caused by the lessor's sole negligence or by the joint negligence of lessor or any person other than lessee. The liability to be covered by the policies of said insurance in case of damage, injury or death otherwise occasioned shall be not less than One Hundred Thousand Dollars ($100,000.00) for property damage, Two Hundred Fifty Thousand Dollars ($250,000.00) for bodily injuries and death in respect of disaster and Fifty Thousand Dollars ($50,000.00) for bodily injuries sustained by or death of any one person.

It is understood and agreed, however, that if such insurance coverage is already provided by lessee pursuant to any other contract or contracts between lessor and lessee, the lessee shall be deemed to be in compliance therewith.

11. Upon completion of the extension, the lessee shall deliver to lessor a certificate executed by the architect of lessee certifying that said extension has been completed in accordance with the building plans, has been paid for in full and is free from all liens.

12. Lessee may use the extension for operations offices, communication offices and baggage handling facilities.

13. Lessor shall maintain and keep the exterior and the roof of the extension in good condition and repair.

Lessees shall decorate and maintain the interior of the building in good condition and repair all damage to the interior not occasioned by ordinary wear and use or caused by lessor. Lessor shall repair any damage to the extension caused by its employees and patrons.

Lessor shall provide electricity for normal interior lighting only. However, lessee shall provide at the lessee's expense electricity for other purposes and water.

14. Lessee shall be entitled during the term of this contract and lease and for a reasonable time after its termination, at the rental rate provided herein, to remove therefrom all tools, machinery and equipment, furniture and trade fixtures placed, installed or constructed thereon by it, subject, however, to any valid lien which lessor may have thereon for unpaid rentals payable hereunder by lessee to the lessor; provided, however, that if the removal of any property results in damage to the extension such damage shall be repaired and the building restored by lessee.

15. Nothing contained in this Agreement shall impair the right of lessor in the exercise of its governmental functions, to require lessee to pay any tax or inspection fees or to procure necessary permits or licenses.

Nothing contained herein shall be deemed to be a grant of any franchise, license, permit or consent to lessee to operate motor coaches, buses, taxis, or other vehicles carrying passengers or property for hire or reward over the public ways of lessor to and from the Airport or to construct or maintain any facilities in, over, under or across any public way to serve lessee at the Airport.

16. No abatement shall be made of any rentals for any cause under the provisions of this Agreement unless the premises demised hereunder to lessee shall be rendered untenable by fire or other casualty in which event the rentals for such premises shall abate on a per diem basis until such time as such premises are rendered tenable, but if other space in the Building or in any other premises of lessor is occupied by lessee for similar purposes pending the restoration of the premises demised hereunder to lessee, lessee shall pay rentals for such space at a rate per annum per square foot as may then be agreed upon between lessor and lessee.

17. In case of the happening of one or more of the following events, that is to say:

(a) Lessee shall voluntarily abandon the business of transportation, in regularly scheduled service to and from the Airport, persons, property and mail by aircraft for a period of ninety (90) days;

(b) default shall be made by lessee in the observance or performance of any covenant or agreement herein required to be kept or performed by it, and such default shall continue for a period of thirty (30) days after written notice specifying such default shall have been given by lessor to lessee;

then, in any such event and during the continuance of such event, lessor may, upon ten (10) days written notice, terminate this contract and lease without forfeiture, waiver or release of lessor's right to any sum of money due or to become due under the provisions of this contract and lease. Upon termination of this Agreement, lessor may but shall not be required or obligated to relet the space in the Addition herein demised. Rental realized therefrom shall be applied in the manner provided in subparagraph (b) of paragraph 3. Acceptance by lessor of rentals after the right to terminate this Agreement accrues, shall not be deemed a waiver of such right to terminate.

18. In case of the happening of any one or more of the following events, that is to say:

(a) Any court of competent jurisdiction shall issue an injunction in anywise preventing or restraining the use of the Airport or its facilities, or any substantial part or parts thereof, to such an extent as to interfere materially with the operation by lessee of an air transportation system from or at the Airport, and such injunction shall remain in force (not stayed by way of appeal or otherwise) for a period of ninety (90) days;

(b) the lessee shall be unable to use the Airport for the conduct of an air transportation system for a period of ninety (90) days, due to any law or executive order or any order, rule or regulation of any appropriate governmental authority affecting the Airport, or to war, bombardment, power or drainage failure, earthquake or other casualty;

(c) the United States Government or any authorized agency thereof shall occupy the Airport or the airport facilities, or any substantial part or parts thereof, such as to interfere materially with the operation by the lessee of an air transportation system to, from
or at the Airport for a period of ninety (90) days; or

(d) default shall be made by the lessor in the observance or performance of any covenant or agreement herein required to be kept or performed by it, and such default shall continue for a period of thirty (30) days after written notice specifying such default shall have been given by lessee to lessor;

then and in any such event and during the continuance of such event, lessee may upon ten (10) days written notice terminate this Agreement and lease in its entirety.

19. 11. City shall not be liable to Avis for any injury to, or death of any person, or for any damage to any property by City, or any of its officers, agents, or employees in the maintenance or operation of said Airport, or navigating any aircraft other than Avis' aircraft, or, whether such injury, death or damage is due to negligence, or otherwise, for all claims for any such injury, death or damage being hereby expressly waived by Avis.

Certificates of such insurance shall be delivered to and held by the City Comptroller.

13. Avis agrees to charge rates for its rent-a-car services at the Airport which shall be the same as rates for similar services charged by it at other locations in the City of Chicago and shall periodically, as requested by the Comptroller, file with City a schedule of such rates. Avis further agrees that it shall remain open and conduct business at the Airport during such hours of the day and such days of the week.

then and in any such event and during the continuance of such event Avis may, upon ten (10) days' notice in writing, terminate this lease and agreement in its entirety.

18. In the event of any national emergency wherein there is a curtailment of the use of motor vehicles by the general public, or a limitation of the supply of gasoline available for general use, either by Executive decree or legislative action, then and in that event, the minimum guarantees provided for in Section 5 hereof, shall not be required to be paid by Avis during the said period.

"The suggested changes on each sheet are as follows:

Sheet 1: Title Sheet will have an amended date.

Sheet 5: A minor revision in Hamlin Avenue Bridge.
Sheet 7: Location of station moved from south side to the north side of Lawrence Avenue.
